For Immediate Release

EJustice Solutions Enhances Online Records Management with Calls for Service

Ann Arbor, Michigan, February 2, 2011 - EJustice Solutions announces the release of Calls for Service. This release enhancement advances our record management systems offering law enforcement agencies more features and functionality.

The Calls for Service module allows a dispatcher to record information from incoming calls including call details, assigned units, call history, geo-mapping, and call disposition. An incident report can also be generated from the Calls for Service module and assigned to the responding officers.

This module is beneficial for smaller agencies not requiring the full functionality and overhead expense of a Computer Aided Dispatch (CAD) system or agencies that would benefit from simplifying their current CAD system.

EJustice continues to innovate and provide solutions for unmet market needs further demonstrating why EJustice Solutions is the leading internet hosted records management provider.

About EJustice Solutions

EJustice Solutions is an industry-leading provider of affordable browser-based [law enforcement record management systems](#). EJustice Solutions records management and [jail management systems](#) (RMS and JMS) deliver real-time, valuable and actionable information to police and other public safety officers at the point of enforcement, and simplify data exchange across law enforcement agencies and jurisdictions. The company's flagship product – EJustice Online – can be accessed from any computer or mobile device with an Internet connection. EJustice Solutions products have a 20-year heritage of service to customers ranging from rural law enforcement agencies to large metropolitan agencies and governmental bodies, including the U.S. Navy.
