For Immediate Release

EJustice Solutions selected by Texas Department of Public Safety as Preferred Vendor for Affordable Online Records Management Systems

Ann Arbor, Michigan, January 6, 2011 - EJustice Solutions is pleased to announce their selection as a preferred vendor by the Texas Department of Public Safety (DPS) for their Remotely Hosted Criminal Incident Records Management System (RRMS) project. As part of this designation, and to assist law enforcement agencies with securing state-of-the-art-records management capabilities, the Texas DPS will award grant funds to agencies to help offset the cost of implementing an information management system. The RRMS project's objective is to increase data capture for TXDPS TDEx and N-DEx which will improve border security operations and criminal investigations across the state. The RRMS project will focus on agencies that are non-automated with no RMS, agencies within "Operation Border Star" and agencies in counties with high drug traffic routes.

EJustice Solutions was selected as a preferred vendor for delivering hosted, browser-based RMS and JMS applications that are robust enough for large police organizations, yet affordable enough for even the smallest of agencies. EJustice's XML export and import functionality easily supports interfaces with third-party CAD, eCitation and Court Systems.

"We currently serve over 50 agencies as customers in the state of Texas and we look forward to delivering affordable solutions to many more agencies that need efficient records management. Our goal is to provide high functioning, low maintenance solutions that are financially sustainable for agency budgets long-term," said Dennis Blanchette, President and CEO of EJustice Solutions LLC.

EJustice Online RMS requires no special hardware or technical expertise to deploy. It provides affordable, anywhere, anytime access using an Internet connection and a standard industry web browser such as Internet Explorer. A typical small agency can sign up and begin accessing EJustice Online RMS in as little as 14 days, without needing to purchase new equipment, install any software, deal with license fees or sit through extensive training.

EJustice Online RMS is convenient and easy to use with processing wizards and integrated TIBRS edits and validations built directly into the product. This functionality ensures that incident reports created in the application will pass TIBRS

verification, eliminating the hassle and staff hours spent doing UCR reporting and at the same time improving the quality and accuracy of the data being reported.

EJustice Online JMS is a browser-based system that records and tracks inmate data from booking through release. This module includes case management functionality that allows court case data, charges, appearance information (e.g., date, time, judge, courtroom), appearance results, and disposition information to be recorded for inmates. Batch processing is available for the cell assignment, periodic check-in/check-out, and inmate exercise components. Multiple jail reporting functions are also available.

EJustice Online incorporates key Texas reporting and data-sharing initiatives as part of the core product. This out-of-the-box integration with TIBRS, TDEx, LEAP, and LEADRS will dramatically increase the participation and benefits for those agencies that do not have the financial or technical resources available to establish and maintain a records management system.

About EJustice Solutions

EJustice Solutions is an industry-leading provider of affordable browser-based law enforcement records management systems. Led by a team with law enforcement and software technology expertise, the company is dedicated to serving those who work to fight crime and build safer communities every day.

EJustice Solutions records management and jail management systems (RMS and JMS) deliver real-time, valuable and actionable information to police and other public safety officers at the point of enforcement, and simplify data exchange across law enforcement agencies and jurisdictions. The company's flagship product – EJustice Online – can be accessed from any computer or mobile device with an Internet connection. EJustice Solutions products have a 20-year heritage of service to customers ranging from rural law enforcement agencies to large metropolitan agencies and governmental bodies, including the U.S. Navy.

EJustice Solutions is headquartered in Ann Arbor, Michigan, with offices in Colorado, Illinois, and Texas. For more information, visit www.EjusticeSolutions.com.
