**For Immediate Release**

**EJustice Solutions Revolutionizes Records Management with EJustice Online**

**August 10, 2010** - EJustice Solutions is pleased to announce the introduction of EJustice Online. The introduction of EJustice Online is revolutionizing records management offering law enforcement agencies a very cost-effective yet full-featured system. EJustice Online Records Management System (RMS) provides customers the ability to access their records management information from any computer or handheld device with internet access.

*"We looked at other systems and no one else could deliver what we needed for near the price of EJustice. Officers love that they can access the system from their cars, which saves time and keeps them on the road and in front of crime. The most important aspect of the system—WE TRUST IT!"* said Thomas Kiefer, LCC Commander Shenandoah (Texas) Police Department

EJustice Online RMS requires no special hardware or technical expertise to deploy. It provides affordable, anywhere, anytime access using an internet connection and a standard industry web browser such as Internet Explorer. A typical small sized agency can sign-up and begin accessing EJustice Online RMS in as little as 14 days.

EJustice Online RMS is convenient and easy to use with processing wizards and integrated state specific crime reporting built directly into the product. This functionality ensures that incident reports created in the application will pass state verification, eliminating the hassle and staff hours spent doing UCR reporting and at the same time improve the quality and accuracy of the data being reported.

With the release of our next generation of internet based solution, EJustice Online offers robust functionality to a broad range of Law Enforcement agencies. Some of the many system upgrades include extensive reporting capabilities such as instant reports and full administration reporting. EJustice Online also gives customers the capability to share information within their jurisdiction as well as other external agencies.

*"Using our combined 120 years of law enforcement experience and working with our customer base has led us to introducing this next generation of records management. Our goal is to provide affordable, anywhere, anytime internet access to information to improve officer safety and effectively investigate and document crime. We are thrilled to lead the online world of law enforcement records*

*management and we're excited to hear from our customers how much easier and faster information capture, exchange, and sharing is by using our online system,"* said Todd Thompson, former Law Enforcement Officer and VP of Product Strategy for EJustice Solutions LLC.

### **About EJustice Solutions**

EJustice Solutions is an industry-leading provider of affordable Internet-based law enforcement records management systems. Led by a team with law enforcement and software technology expertise, the company is dedicated to serving those who work to fight crime and build safer communities every day.

EJustice Solutions records management and jail management systems (RMS and JMS) deliver real-time, valuable and actionable information to police and other public safety officers at the point of enforcement, and simplify data exchange across law enforcement agencies and jurisdictions. The company's flagship product – EJustice Online – can be accessed from any computer or mobile device with an Internet connection. EJustice Solutions products have a 20-year heritage of service to customers ranging from rural law enforcement agencies to large metropolitan agencies and governmental bodies, including the U.S. Navy.

EJustice Solutions is headquartered in Ann Arbor, Michigan, with offices in Colorado, Illinois, and Texas. For more information, visit [www.EJusticeSolutions.com](http://www.EJusticeSolutions.com).
