EJustice Solutions Reports Online Record Management Systems Quarterly Wins

Ann Arbor, Michigan, October 6, 2010 - EJustice Solutions is pleased to announce the addition of nine new customers to our growing family of law enforcement agencies. Texas Blanco Police Department, Texas Clyde Police Department and Texas Aledo ISD Police Department are just a few of the many agencies in Texas that have recently chosen EJustice Solutions.

EJustice Online is transforming records management by offering law enforcement agencies a very cost-effective yet full-featured system. EJustice Online Record Management Systems (RMS) provides customers the ability to access their records management information from any computer or handheld device with internet access – anywhere, anytime.

EJustice Online RMS requires no special hardware or technical expertise to deploy. A typical small sized agency can sign-up and begin accessing EJustice Online RMS in as little as 2 weeks. The software offers extensive reporting capabilities such as instant reports and full administration reporting. It also gives customers the capability to share information within their jurisdiction as well as with other agencies throughout their region, if desired.

EJustice Online RMS is convenient and easy to use, with processing wizards and integrated state specific crime reporting built directly into the product. This functionality ensures that incident reports created in the application will pass state verification, eliminating the hassle and staff hours spent doing UCR reporting and at the same time improving the quality and accuracy of the data being reported.

About EJustice Solutions

EJustice Solutions is an industry-leading provider of affordable browser-based [law enforcement record management systems](#). Led by a team with law enforcement and software technology expertise, the company is dedicated to serving those who work to fight crime and build safer communities every day.

EJustice Solutions records management and [jail management systems](#) (RMS and JMS) deliver real-time, valuable and actionable information to police and other public safety officers at the point of enforcement, and simplify data exchange across law enforcement agencies and jurisdictions.
