

Press Release: June 28th, 2011

State of Texas Verifies EJustice Solutions Hosted Applications are 100% CJIS Compliant

EJustice Solutions' remotely hosted law enforcement software application services, along with the data center facilities operated by its managed services hosting partner, Secure-24, have been found to be in full compliance with the Criminal Justice Information Services (CJIS) Security Policy requirements (version 5.0), based on an onsite audit performed by the Texas Department of Public Safety (TXDPS).

This is the result of concerted efforts by EJustice and Secure-24 to ensure the EJustice software and data center operations meet all CJIS policy requirements. As part of the process all employees at both EJustice and Secure-24 with access to Criminal Justice Information (CJI) have been subjected to fingerprinting and background checks. The audit performed by TXDPS occurred in conjunction with the selection of EJustice Solutions a Certified Provider on the TXDPS Remotely Hosted Records Management System Project. As part of this statewide program, EJustice will be adding more than 40 Texas law enforcement agencies as new customers. These additions will bring the total Texas customer base using EJustice hosted application services to over 100 agencies.

The CJIS Security Policy is published by the FBI in partnership with the CJIS Advisory Policy Board (APB), which is composed of representatives from state and local law enforcement agencies. The CJIS Security Policy integrates Presidential directives, Federal laws, FBI directives and the criminal justice community's APB decisions along with nationally recognized guidance from the National Institute of Standards and Technology. The goal of the policy is to provide a unified set of standards and best practices to ensure that CJI data is kept secure and only accessed by authorized law enforcement personnel in the performance of their duties.

EJustice Solutions is an industry-leading provider of affordable browser-based [law enforcement record management systems](#). EJustice Solutions Records Management and [Jail Management systems](#) (RMS and JMS) deliver real-time, valuable and actionable information to police and other public safety officers at the point of enforcement, and simplify data exchange across law enforcement agencies and jurisdictions.
